

Local Land Services

# Local Land Services graduate program 2024

We're hiring!

Local Land Services is a regionally focused NSW Government agency providing services, advice and assistance to farmers and landholders in rural and regional communities with the intention of supporting them to be profitable and sustainable into the future.

We're seeking graduates with qualifications in Environmental Science, Agriculture or Veterinary Science to join us for 12 months from January 2024.

With 11 regions and offices across regional NSW, our graduates will have the opportunity to be placed in some of our most exciting regional locations.

Local Land Services is a "boots on the ground" organisation that is making a real difference, delivering quality customer service to farmers, landholders and the wider community in regional NSW.

This is what our current graduates have to say!

"The ongoing training and opportunities to upskill is incredible, and the ability to work alongside some very experienced and knowledgeable people within LLS and industry bodies is such a special opportunity. Not only does it provide the opportunity to pick some amazing brains but it is also a great way to network".

*Lauren Adler, 2023 Ag Graduate - Central Tablelands*

"Since starting with LLS, I've been involved in emergency management response, presented at field days, worked closely with sheep, cattle, goat and pig producers, conducted health and wellness audits at our regional saleyards, traced notifiable diseases such as footrot, and been involved in disease investigations".

*Ash Halligan, 2023 Vet Graduate - Riverina*

As a Local Land Services graduate, you will have the opportunity to apply the knowledge and skills gained through your university degree in a dynamic, supportive organisation focused on enhancing community outcomes across NSW. Just some of the benefits of working for Local Land Services include:

- flexibility and work life balance
- ongoing training and support
- fostering connections with industry experts
- strong links between work and community impact
- regionally based employment and attractive locations
- opportunity to be involved in large scale programs and initiatives (e.g. emergency management, pest eradication, disaster recovery)
- a safe and inclusive workplace
- access to industry roadshows and conferences (e.g. AgQuip).

## Available locations

We have 10-12 graduate positions available across the 3 disciplines. With offices all across regional NSW, our graduates will have the opportunity to be part of our major statewide projects or immerse themselves in region-specific business units.

Whilst there is no guarantee of preferred location at the beginning of the recruitment process and the location of some roles will be negotiable, the following locations have a pre-identified requirement to fill a graduate role.

## Agriculture Science

### Riverina region

Location: Wagga with potential for some flexibility across the region.

### Western region

Location: Flexible across the region (Bourke, Cobar, Hillston, Buronga, Wentworth, Broken Hill).

## Environmental Science

### Western region

Location: Flexible across the region (Bourke, Cobar, Hillston, Buronga, Wentworth, Broken Hill).

## Veterinary Science

### Greater Sydney region

Location: Penrith or Gosford.

### Murray region

Location: Albury.

### Western region

Location: Buronga, Broken Hill, Bourke.
