### Records Management

Minimum Standards	Things to look for	Complies
<b>Record keeping</b> Method of record keeping Recording all animal and client details Options given Referral  Certification	All consultation details, weights, tests, treatments, diagnosis, options, referrals, important client communications recorded in sufficient detail to allow another vet to take over the treatment of the case. Recording the fact that phone call/s were made to the client, options, consents, estimates discussed and recorded.  All certification is true and accurate and a 'known fact' of the vet providing the certificate e.g. vaccination.	
<b>Treatment admission forms</b> Procedures listed Estimate given	Evidence of informed consent to treatment.  Evidence that an estimate for the treatment was provided, a range is acceptable.	
<b>Records kept for 3 years</b>	Archive records in such a way so they are easily identified and retrieved and to allow appropriate disposal if required after 3 years.	
<b>Copy of legislation</b> Website Boardtalk  Code of Conduct	All the information regarding legislation, policies, guidelines, searchable current database of vets, specialists and hospitals etc. is available from the Board's website. Additional guidelines such as the AVA's guidelines for personal biosecurity are also available under Useful Links.  Download the 'Veterinary Practitioners Code of Professional Conduct' from website under Resources, Guidelines, Registration. Ensure all vets are aware of it.	
<b>Itemised receipts given</b>	At discharge, all clients should receive an itemised receipt of charges incurred as a result of any treatment whilst the animal was in hospital.	
<b>Discharge information</b> Post-surgery After hours care	Clients are provided with documented post treatment care of their animal to take home. Procedures in place to be available after hours for that discharged animal or have arrangements in place with another practice should the patient need veterinary care.	
<b>Use of drugs off label</b>	To be used only when well recognised current knowledge permits and client is informed.	
<b>Reference material current</b>	Reference material is appropriate, accessible and current for the work being performed e.g. web based / library.	

### Your general comments and areas that might be improved
